# QUESTION 1- What is the number of tracks in each Playlist?

The pivot chart shows that the music has the highest total number of playlist followed by the 90's Music, which could mean that the music genre is the most diverse and listened to, with a range of tracks from different artists and time period.

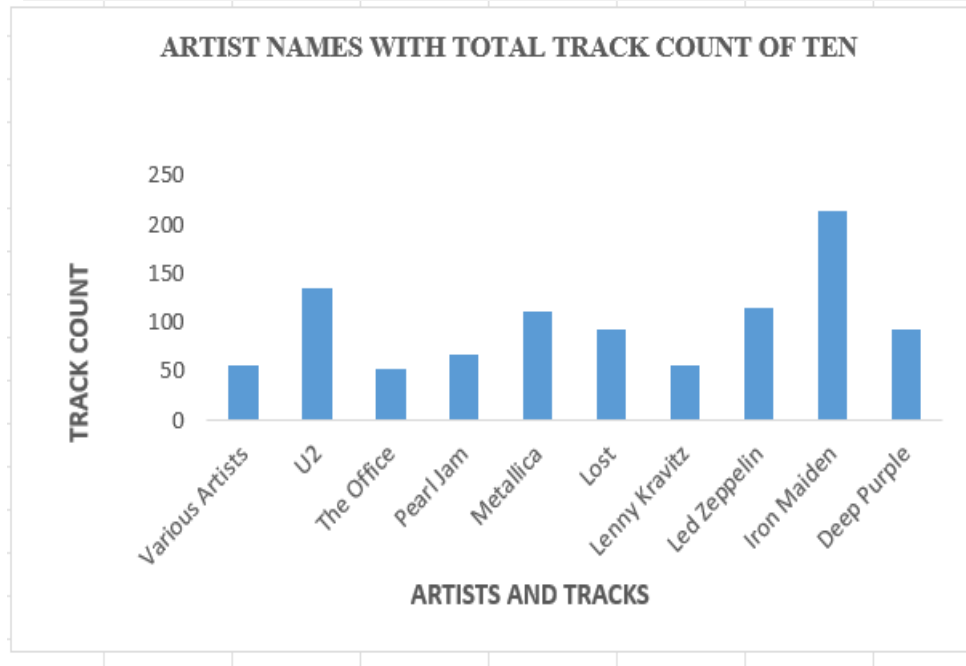

The 90s music genre may also have a a diverse range of tracks and be a popular era for listeners.

## QUESTION 2 – WHAT IS NAMES OF COUNTRY WITH TOP GENRE?

The USA had the highest number of Genre in descending order.

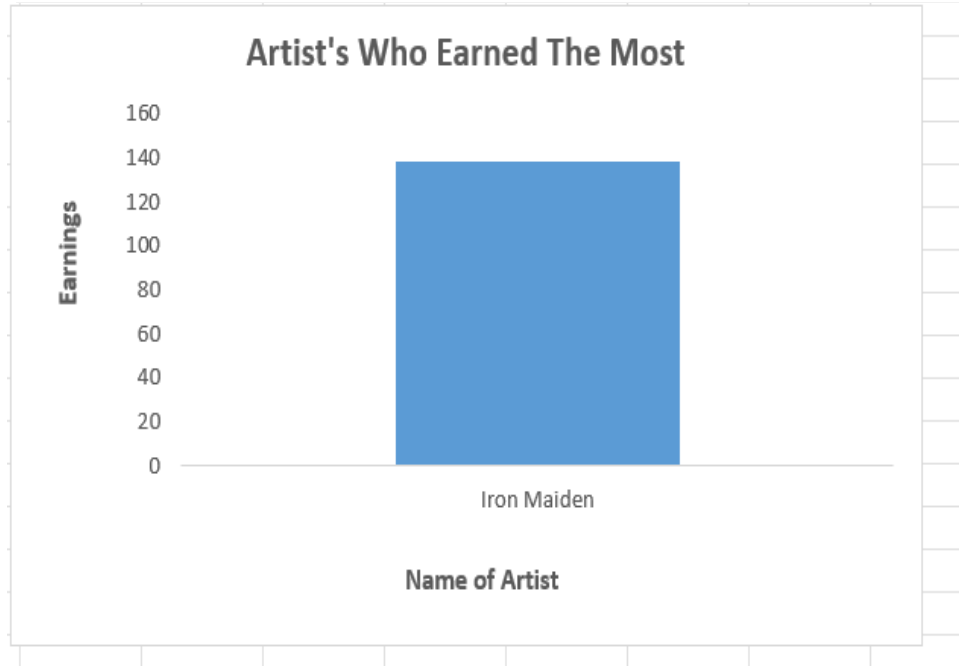

## QUESTION 3 - WHAT IS ARTIST NAME WITH TOTAL TRACK COUNT OF TEN?

Iron maiden has the highest track count of about 200, while U2 had the next highest number of about 140.

The chart is almost evenly distributed; it can be inferred that data being represented is even, and is also possible that the data is bimodal, meaning there are two distinct groups with a similar frequency, where the highest bar represent one of these groups.

## Question 4 – Which Artist Has Earned The Most According To The Invoicelines?

The chart represents a categorical data with numerical value that shows the Artist with highest earning.
